

 GlossMA X PRO  
ACRYLIC LACQUERED PANEL

# SHINING ROOMS WITH GLOSSMAX PRO

GLOSSMAX PRO high gloss panel is a wooden panel with decorative glossy surface, which is produced by applying glue and UV acrylic lacquer onto the surface of melamine coated MDF or Particle Board through various industrial processes with advanced and unique technology. Higher surface quality and an impressive glossiness has been achieved with the minimized surface effects thanks to the Calender Coating Inert technology. After the chemical curing of the Polymeric glue (hot coating) process, which provides not only physical but also excellent chemical adhesion to the melamine coated surface, a superior surface is obtained by applying lacquer with respect to cutting quality and workability compared to other glossy surfaces.

# ADVANTAGES OF GLOSSMAX PRO

## MAXIMUM PERFORMANCE

### High gloss and surface resistance...

With patented PUR glue application technology, it has a much better cutting and processing capability than its counterparts in the market. High protection is provided until the moment of delivery by the foil and protecting foam on the surface during the process.

## MAXIMUM ADAPTATION

### In the same colors and patterns with the Kastamonu Entegre Medelam&Teknolam...

One side of the decorative panel is glossy and the other side is covered with the same colored decor paper. It can be applied to all melamine coated decors. In this way, color integrity is ensured on the rear and front surfaces of the panels. The decorative panel attracts attention with its high level of natural surface appearance. It is produced as MDF and Particle Board with rich color variety.
