«Simplicity is genius»,

This is what we say about things that can easily change our lives for the better. We are used to having refrigerators, running water and fountain pens, things that were innovations in their day, and which changed our daily lives. Today transforming your interior with laminate flooring can be as simple as using a vacuum cleaner. Lighters, toothbrushes, cameras, these are all things, just like Floorpan laminate, which have proven that change for the better can be found in simplicity.

To inspire you to make positive changes to your life, we offer you our special collections: a collection of stories about useful inventions, and the KASTAMONU Floorpan laminate flooring collection. We believe that living better is easy and we are here to help you achieve this.

Winning is easy

It was not easy to use the fire extinguishers: they had to be lit and thrown like bombs into the burning building. And only with the invention of the foam extinguisher by the Russian engineer Lorag did fire fighting become much easier.
