TECHNOTOP WORKTOPS

Technotop, having multi purpose usage areas as kitchen and bathroom worktops, are produced by using the latest technology and modern machines, with moisture resist (MR) Technopan or standard Technopan particleboards, Cpl and Hpl laminate. Laminate used on the top surface and the underside water-resistant layer protect the worktop from moisture and water. This characteristic makes it an excellent choice in places such as the kitchen and bathroom, where hygiene is very significant. Technotop worktops are excellent alternatives compared to acrylic based granite and marble worktops in terms of price. In addition, worktop surfaces are highly resistant to scratches, high temperature, steam, water, stains, impact, and abrasion and are easy to clean. Decors and surfaces which are the result of a comprehensive selection procedure applied by our experts, provides the buyer easy and perfect choosing opportunities for modern applications. Plain and wood decors which are available in approximately 70 decors are compatible with the Kastamonu Technolam and Medelam decors.

TECHNOTOP FEATURES

DECORATIVE LAMINATE TOP LAYER

(Resistant to scratch, steam, heat, water, stain, impact and abrasion). On the top layer is HGP (General Purpose Postforming) Laminate as per EN 438 Norms.

PVC EDGE BAND

Additional protection on the back side against moisture.

PARTICLE BOARD

E-1, Harmless to human health.

MDF BAND

Additional protection against impact.

DROPPER

Coated with polyurethane hot-melt glue, which prevents water drops coming from the top layer, leaking to the bottom layer.

BALANCE PAPER

Barrier paper which is resistant to moisture and water.

U PROFILE

Thickness: 38x600x3660mm.

38 mm 3R

- Decorative laminate top layer
- 38 mm Thickness
- 3 Radius
- 38x600x3660 mm
- Barrier paper which is resistant to moisture and water.

TECHNOTOP WORKTOPS

LENGTH

Standard length 4100 mm

WIDTH

600 mm (one-sided), 900 mm (two-sided)

THICKNESS

28 mm and 38 mm

SUBSTRATE PANEL

E1 class particleboard

SURFACE

Laminate with overlay

WORKTOP BOTTOM

Balance paper resistant to water and moisture

DROPPER

With polyurethane hot-melt adhesive seal
Technical drawings about U profile are
one the side

WORKTOP REAR SIDE

0,4 mm pvc edge band

RADIUS

28 mm (4 radius), 38 mm (3 radius)

PACKAGING

Worktops are coated individually with
shrink-wrapped foil

PALLET

14 pieces for 28 mm, 10 pieces for 38 mm

PRODUCTION DIMENSIONS

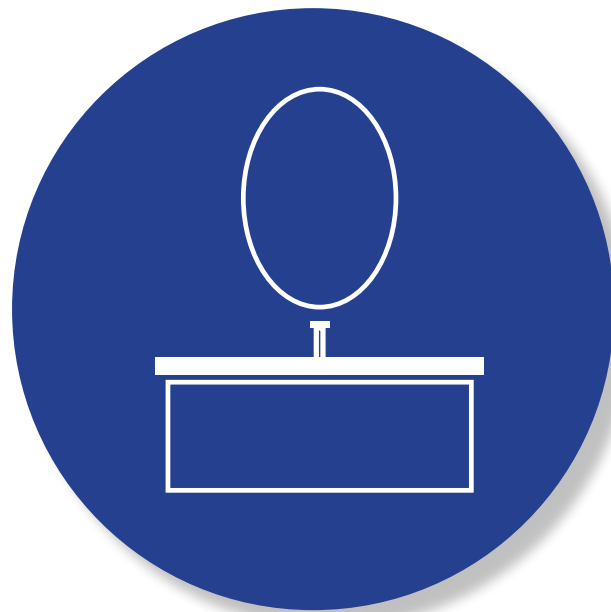

Production can be made according to the
order with different length, width and thick-
ness

PROFILE

Technical drawings about U profile are one

AREAS OF USAGE

BATHROOMS

KITCHENS

OTHER
(RESTAURANTS, HOTELS, BARS ETC.)

TECHNOTOP PANEL ADVANTAGES

01

The laminate panel used on the top surface of the worktop and the layer on the sub-surface of the worktop protect the worktop against damp and water.

02

The Technotop worktops are an excellent alternative in terms of price compared to the acrylic based granite and marble worktops.

03

It is an excellent choice in places, where hygiene is very important, such as kitchens and bathrooms.

04

The worktops are resistant to scratches, heat, steam, water, stains, impacts and wear. They can be cleaned easily.

05

The carefully chosen decors and surfaces offer a comfortable and easy selection possibility for modern applications.

06

The range of products consisting of 70 decors is fully compatible with Teknolam and Medelam colors.
