

Extra durability, extra elegance... Compact Panel!

Compact Panel

Technical Features

- Compact Panel is a flagship $\geq 1000 \text{ kg/m}^3$ high-density compact panel pioneering in the wood panel industry, taking the conventional MDF a step further.
- The homogeneous black fiber content of Compact Panel eliminates edge banding and enables easy application in woodworking machines including routers and CNCs.
- Compact Panel is highly resistant to physical and mechanical elements.
- Compact Panel is equipped with the Safe Surface technology, an industry first in Turkey, offering protection against bacteria, viruses, and fungi.
- It is manufactured with E0 (Zero Emission) standards.
- Compact Panel production uses sustainable forest resources.
- It is suitable for decorative use in crowded shared spaces such as schools, hospitals, cubicles, and shopping malls.
- Compact panels can be manufactured with a high abrasion-resistant surface for architectural projects.
- Melamine-coated Compact Panel Vision can be produced on demand in any color available in the palette.

MANUFACTURING SIZE FOR COMPACT PANEL

Size: 1830x2440 mm, 2100x2440 mm and 1830x3660 mm

Surfaces: NTR

Density: $\geq 1000 \text{ kg/m}^3$

Panel Color: Black

- It can be manufactured to size. • Manufacturing available in all colors in the swatchbook.
